to section V.

1. The present invention relates to a method of operating broadcast or multicast apparatus, to a information service broadcaster or multicaster, to a method of operating a receiver, to a receiver and to a user interface, according to the features of claim 1 and the amended independent claims 7, 13 and 19 respectively.
2. The closest prior art document is considered to be document WO-A-01 99348 (first document cited in the international search report) and is acknowledged in the opening part of the description.
3. According to the features of the independent claims the inventive step consists in that a information service broadcaster or multicaster produces broadcasting or multicasting data indicating a category to which one or more announcements on a lower level and relating to an information service belong and data indicating the quantity of announcement information transmitted in respect of the lower level announcements.

The underlying concept is not disclosed in or rendered obvious by the cited prior art documents. The subject-matter of the independent claims thus fulfils the requirements of Article 33 PCT.

4. The dependent claims contain further details on the subject-matter of the respective independent claims. These dependent claims merely limit the scope of protection sought by the independent claims and are therefore also considered to fulfil the requirements of Article 33 PCT.
